

(SEA)results® Strategic Portfolio Management System

Higher Education's First and Only Vertical-Specific SPM Platform

(SEA)results is a strategic portfolio management platform built specifically for higher education institutions. It helps leaders make smarter decisions by ensuring that the right people are working on the right projects to support institutional goals. With (SEA)results, you can prioritize initiatives, align resources, and drive progress toward your strategic vision.

Why should you implement a strategic portfolio management solution?

(SEA)results assists higher education leaders in making tough decisions. These are just some of the benefits you realize with an objective prioritization process and transparent planning.

- Balance the needs of enrollment pressures, student retention & outcomes, and fiscal restraints by prioritizing projects in ways that are meaningful to your institution.
- Improve project delivery with intentional actions around resource allocation, while ensuring that they do not negatively impact students.
- Reduce implementation complexity by addressing typical change management pitfalls, particularly around new digital transformation initiatives.
- Build transparent, consensus-driven decisions based on data not emotion.

Key Features

(SEA)results is a powerful solution that combines change management principles with risk and resource management for all your strategic planning needs.

- **Strategic Plan:** Auto upload of strategic plans
- **Project Prioritization:** Aligns projects with strategic objectives.
- **Change Management:** Facilitates best practices in change management.
- **Resource Optimization:** Ensures optimal allocation of resources, noting resource overloads
- **Performance Tracking:** Monitors key performance indicators
- **ROI and Operational Measurement:** Manage resources and task completion
- **Roadmap:** Forecast project deliverables based on resource commitments
- **Harness Artificial Intelligence:** AI generated recommendations help you achieve faster
- **Integration:** Integrate project and resource data from common tactical trackers such as Jira, DevOps or Excel
